Involved in lymphocyte activation. Playi an important role in HSV pathogenesis because it enhanced the entry of several wildtype HSV strains of both serotypes into CHO cells, and mediated HSV entry into activated human T cells. SUBCELLULAR LOCATION: Type I membrane protein (Probable). SUBCELLULAR LOCATION: Type I membrane protein (Probable).

Pred. No.

is the number of results predicted by chance to have a

score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
